Github: github.com/shreya-ghimire

PROFESSIONAL SUMMARY

Backend-focused Software Engineer experienced in building scalable applications and RESTful APIs using Node.js, Express.js, and PostgreSQL. Skilled in database optimization, multi-tenant architecture, payment integrations, real-time systems, and third-party API integrations. Experienced in developing AI-powered features using OpenAI APIs, with additional expertise in React, Next.js, and TypeScript. Strong understanding of system design, application performance, and Agile development practices.

SKILLS

- **Backend Development:** Node.js, Express.js, PostgreSQL, SQL, Redis, RESTful APIs, JWT, RBAC, Multi-tenant Architecture, WebSockets, Socket.IO, Webhooks, Third-party Integrations, Docker, Amazon EC2.
- **Backend Architecture & Performance:** Microservices, Modular Architecture, Event-Driven Architecture, Database Design, Query Optimization, Indexing, Caching, Background Jobs, API Security, Rate Limiting, Error Handling, Logging, Monitoring, System Design.
- **Frontend Developement:** React, Next.js, TanStack Start, TypeScript, JavaScript (ES6+), React Hooks, React Router, Tailwind CSS v4, shadcn/ui, Material UI, HTML5, CSS3, Responsive Design, Dynamic Theming, State Management, REST API Integration.
- **Git & Project Management:** Git, GitHub, GitHub Actions, Pull Requests, Code Reviews, Jira, Agile/Scrum, Sprint Planning, Backlog Refinement, Retrospectives.
- **AI-Assisted Development:** Claude, Claude Code, Cursor, OpenCode, AI Code Generation, Refactoring, Debugging, Test Generation, Prompt Engineering, Codebase Exploration.

WORK EXPERIENCE

Resimator
Software Engineer
November 2025 - *September 2026*
Kathmandu, Nepal

- Developed a multi-tenant POS platform using Node.js, Express.js, PostgreSQL, React, Next.js, and TypeScript.
- Built backend services for sales, inventory, order management, checkout, refunds, discounts, and transaction processing.
- Integrated Stripe and Apple Pay, implementing payment workflows, webhook handling, and transaction management.
- Integrated third-party applications for seamless synchronization of orders, inventory, and customer data.
- Designed and optimized PostgreSQL schemas, database transactions, and Redis caching for efficient data processing.
- Developed responsive frontend components and POS interfaces using React, Tailwind CSS v4, and shadcn/ui.
- Utilized Claude, Cursor, and OpenCode for AI-assisted development, debugging, refactoring, and test generation.

247 Software
Associate Software Engineer
September 2024 - *November 2025*
Pune, India

- Developed backend services and REST APIs for an Incident Management System using Node.js, Express.js, and PostgreSQL.
- Implemented incident lifecycle management, including incident creation, assignment, tracking, escalation, and resolution.
- Integrated OpenAI APIs to build AI-powered chat functionality for intelligent incident assistance.
- Implemented real-time incident notifications and updates using Socket.IO.
- Developed Map Wrapper integration for location-based incident tracking and geographical visualization.
- Designed database schemas, optimized SQL queries, and implemented JWT authentication and role-based access control.
- Developed automated tests using Jest and Supertest, and monitored production issues using Sentry and Datadog.

Geeks For Geeks
Freelance Technical Writer
March 2024 - August 2024
Remote, India

- **Link:** *www.geeksforgeeks.org/user/ashreysfse5/contributions*
- Authored and contributed 10+ project-based tutorials and 20+ improvements covering frontend, backend, and full-stack development, helping thousands of developers learn practical implementations.
- Built hands-on projects in React.js, Node.js, and MongoDB**,** translating them into step-by-step guides with code snippets, architectural breakdowns, and best practices.
- Integrated MongoDB Atlas into projects and designed database schemas, providing readers with practical experience in building scalable data models.
- Used Express.js to build REST APIs and demonstrated how to integrate them with React-based UIs**,** offering end-to-end application workflows.

Tucious
UI Designer and Human Resource Manager
December 2021 - July 2022
Part-time, Chandigarh, India

- Led the UI design team in creating user-friendly interfaces for web and mobile applications.
- Created wireframes, prototypes, and interactive designs using Figma.
- Collaborated with the Business Development team on lead generation, prospecting, and client relationship management.
- Prepared business proposals through market research and marketing strategy development.
- Analyzed real-time business models and identified opportunities for business growth.
- Assisted HR activities, including recruitment coordination, candidate screening, team onboarding, and employee management.

Fiverr
Freelance Banner Graphic Designer
August 2020 - December 2020
Remote, Kathmandu

- Designed and delivered 20+ promotional banners using Adobe Photoshop, Illustrator, and Canva.
- Created customized marketing graphics and social media banners based on client requirements.
- Managed client communication, project revisions, and timely delivery through Fiverr.
- Promoted freelance services through Reddit and online communities to generate leads and acquire clients.

EDUCATION

Bachelor of Engineering Computer Science Engineering, *Chitkara University* c.g.p.a: 9.42	Higher Secondary Level (10+2) Science *CBSE* Percentage: 91.2	Secondary Level (SEE) *CBSE* Percentage: 83.2

PROFESSIONAL LICENSE

Registered General Engineer
Nepal Engineering Council
Computer Engineering

PUBLICATIONS AND ARTICLES

The Illusion of Opting: Algorithmic Decision Architecture and the Erosion of Digital Autonomy: Examines how algorithmic recommendation systems, AI, and digital platforms subtly shape human choices, exploring their impact on personal autonomy, decision-making, and freedom in the digital age.
Link: https://shreyaghimiree.substack.com/p/the-illusion-of-opting-algorithmic

Explain MemoryRouter in React Router: Explains how React Router's MemoryRouter manages in-memory navigation and route history without modifying the browser URL, highlighting its use cases in testing and isolated application components.
Link: https://www.geeksforgeeks.org/reactjs/explain-memoryrouter-in-concept-of-react-router/

Integrating Machine Learning Models into React Hooks Applications: Demonstrates integrating TensorFlow.js and MobileNet into React applications using Hooks to load machine learning models, classify images, and manage real-time prediction results.
Link: https://www.geeksforgeeks.org/reactjs/integrating-machine-learning-models-into-react-hooks-applications/

ACHIEVEMENTS

- Awarded Contributor Badge on *GeeksforGeeks* for consistent technical content contributions.
- Secured Top 10 design recognition in *Octahacks Hackathon*, showcasing creativity and problem-solving in product design.
- Achieved 9.42 CGPA in *B.E. Computer Science and Engineering*, reflecting strong academic performance.
